

MESO AROMA

The Complete Range of

Aesthetic Mesotherapy

HA2

10
5ml each

Hyaluronic acid can boost skin's moisture content and help prevent moisture loss. Hyaluronic acid has the ability to retain water in an amount equivalent to thousands of times their weight. That is why it is used for hydration of the epidermis and reconstituting the fibers that hold skin tissue, prevent and fills wrinkles and helps water retention smoothing the skin folds. As a medium and long term, hyaluronic acid, stimulates collagen production which extends and multiplies the rejuvenating result.

METHODS OF APPLICATION:

Anti-Wrinkle, Moisturizing, Antiaging, Deep wrinkles filler use HA 2.

INGREDIENTS:

AQUA, SODIUM HYALURONATE, SODIUM BENZOATE.

HYDROVITAMIN

10
5ml each

Ascorbic acid / Vitamin C is a water-soluble vitamin that is considered a potent antioxidant for skin. It has been shown to increase collagen production (including dermal collagen, which is significant for wrinkle reduction), reduce the appearance of skin discolorations, strengthen skin's barrier response, enhance skin's repair process, reduce inflammation, and help skin better withstand exposure to sunlight, whether protected by sunscreen or not.

METHODS OF APPLICATION:

Antiaging, Melasma Topic, Dermatitis, Psoriasis, Hairloss.

INGREDIENTS :

ACQUA, ASCORBIC ACID, SODIUM BICARBONATE, EDTA DISODIUM.

BTX LIKE

10
2ml each

(ARGILERINE 10%) Argireline/Acetyl hexapeptide-3 is a synthetic anti-wrinkle cosmetics ingredient. It is a peptide which is a shortened version of Botulinum toxin (Botox). Argireline is used in attempts to decrease the visible effects of aging by reducing the deep wrinkles and lines that occur around the forehead and eyes.

METHODS OF APPLICATION:

Treatment of wrinkles and skin depressions with biolifting effect.

INGREDIENTS:

AQUA, ACETYL HEXAPEPTIDE 8.

GLYCOLIC ACID 1%

10
10ml each

Glycolic acid is the most active and beneficial of the Alpha-Hydroxy-Acids (AHA) is derived from sugar cane. It has the smallest molecular structure of all AHAs, thus possesses the greatest penetration potential. Inside the cell, it stimulates the collagen and elastin fibers in the dermis, improving the appearance of wrinkles, fine lines and other forms of sun damage. Due to this unique mechanism of action, glycolic acid has also been found to be beneficial for the management of conditions involving hyperkeratinization, i.e., psoriasis, ichthyosis, acne, dry skin, etc. Anyone suffering from these skin disorders would benefit greatly from the use of glycolic acid.

METHODS OF APPLICATION:

Face, Neck, Chest, Hands, Foto aging, Acne.

INGREDIENTS

AQUA, GLYCOLIC ACID, SODIUM BICARBONATE.

VITCOMPLEX

5
5ml each

4 MINERALS, 8 VITAMINS

It's a multivitamin solution and a powerful skin anti oxidant. Advant in face lift and anti-aging treaments. Improves skin appearance in combination and oily skin and Revitalizes dry skin.

METHOD OF APPLICATION:

Face, Neck,Cleavage, Abdomen, Hands and Arms.

INGREDIENTS:

AQUA, SODIUM ASCORBATE, PEG-35 CASTOR OIL, RETINYL PALMITATE, NIACINAMIDE PANTHENOL, TOCOPHERYL ACETATE, TIAMINE NITRATE, SODIUM RIBOFLAVIN PHOSOPHATE, PYRIDOXINE HCl, POTASSIUM GLUCONATE, MAGNESIUM GLUCONATE, SODIUM GLUCONATE, GLYCINE, METHYLSILANOL MANNURONATE, SODIUM BENZOATE, POTASSIUM-SORBATE.

GSH

10
5ml each

Glutathione is a tripeptide composed of L-cysteine, L-glutamic acid and glycine. It is a very interesting, very small molecule that's produced by the body and found in every cell. It's the body's most important antioxidant because it's within the cell. Antioxidants – the most well known of which are vitamins C and E are important for good health because they neutralize free radicals, which can build up in cells and cause damage. Because glutathione exists within the cells, it is in a prime position to neutralize free radicals. It also has potentially widespread health benefits because it can be found in all types of cells, including the cells of the immune system, whose job is to protect the body against disease, toxins, viruses, pollutants, radiation, drugs and oxidative stress.

When damage does occur, it immediately goes to work repairing the free radical damage and reactive oxygen compounds keeping the maintenance of antioxidants such as vitamins C and E.

METHODS OF APPLICATION:

Antiaging treatments, Depigmentation treatments.

INGREDIENTS:

AQUA, GLUTATHIONE,SODIUM CHLORIDE.

PC 100mg/ml

5
5ml each

Phosphatidycholine is an active ingredient in lecithin. The lecithin acts by increasing the action of enzymes that degrade the lipids of the cell membrane. In fat cells, this action increases the fluidity and permeability of the membrane adipocyte, facilitating the release of fat. Lecithin also increases the solubility of cholesterol. Every cell membrane in the body requires phosphatidylcholine (PC).

It is also a major source of the neurotransmitter acetylcholine.. PC is considered a very good water-binding agent and aids in the penetration of other ingredients into the skin. It absorbs well without feeling greasy or heavy. PC is used in aesthetics is restriced to small localized fat deposits in patients with ideal body weight or slightly overweight.

The sodium is derived from deoxycholic acid, its action is charateized because it emulsifies fats and facilitates the action of lipase. Then converts fat (hydrophobic) in water-soluble, facilitating its removal.

METHODS OF APPLICATION:

Localized fat deposits, Unsightly fat deposits, Silhouette shaper.

INGREDIENTS:

AQUA, LECITHIN, SODIUM DESOXYCHOLATE, BENZYL ALCOHOL, SODIUM CHLORIDE.

SC COCKTAIL

10
5ml each

A synergistic mixture which revitalizes the skin and slows down the aging process. The solution contains liposome plant that stimulates the skin tissue, activates proliferation of the fibroblasts in the dermis and increase collagen production by inhibition of endogenous collagenase. Enriched with sodium salt of DNA, its endowed with great capacity to absorb water, this vial is a powerful antioxidant that counteracts free radicals, inhibits the degradation of collagen and elastin and of hyaluronic acid.

Furthermore, the formulation sees synergy between ferulic acid and Q10, powerful antioxidants that protect and delay the signs of photo aging. The ferulic acid neutralizes free radicals and protects the skin from UV damage Q10 improves cellular respiration.

METHODS OF APPLICATION:

Face, Neck, Scalp, Stretch marks, Scars.

INGREDIENTS:

AQUA, SODIUM CHLORIDE, SODIUM DNA, FERULIC ACID, UBIQUINONE, CERAMIDE 3, BUTYROSPERMUM PRAKII, SQUALANE, PHYTOSTEROLS, OLEA EUROPEA FRUIT OIL, LECITHIN, HYDROLYZED WHEAT PROTEIN.

HAIR COCKTAIL

10
5ml each

A mixture of mainly antioxidant active ingredients, cytoprotectors and biostimulants able to improve blood circulation and nutrition to the hair follicle, with the aim of reactivating it. They also improve hair quality, producing a better structure of the keratin which not only makes it stronger, but also makes its role in reflecting certain rays of light more efficient. Its use is indicated for people with hair loss due to unsuitable hair treatments, people with nutritional and endocrinal disorders which deteriorate the hair and as a help in the case of hereditary alopecia. Also as a complement in treatments of alopecia areata.

Patients offered treatment with this product will experience an improved quality of their hair, which will become shinier and with a better defined color, there will also be denser hair growth.

METHOD OF APPLICATION:

Hair loss.

INGREDIENTS:

PANTHENOL, PYRIDOXINE, THIAMINE, BIOTINE, IRON GLUCONATE.

LIFT COCKTAIL

10
5ml each

A mixture with lifting effect consisting of Hyaluronic Acid, essential active principle for the moisturising and reconstitution of the dermis, Sodium DNA, with trophic action on the skin, slightly modifying the cells of the basal layer of the epidermis, Organic Silicon and DMAE with a tightening effect on the skin, restoring tone, and a solution based on Vitamins A, B, C and E with a revitalizing, nourishing and illuminating effect on the skin.

METHODS OF APPLICATION:

Face, Neck, Forehands, Scalp.

INGREDIENTS:

AQUA, SODIUM MANNURONATE METHYLSILANOL, CAFFEIN, SODIUM HYALURONATE, SODIUM HIDROXIDE, SODIUM DNA, SODIUM BENZOATE.
